De Smet School District Wellness Policy

Note: A local school wellness policy is a written document that guides a local education agency (LEA) in establishing a healthy school environment. Each LEA participating in the National School Lunch Program (NSLP) and/or School Breakfast Program (SBP) is required to establish a written local school wellness policy for all schools under its jurisdiction (7 CFR 210.31 c)). This “Basic” district-level wellness policy template meets the minimum Federal standards for local school wellness policy implementation under the final rule of the [Healthy, Hunger-Free Kids Act of 2010](#), the Alliance for a Healthier Generation Healthy Schools Program Bronze-level award criteria, and minimum best practice standards accepted in the education and public health fields. School districts should choose policy language that meets their current needs and also supports growth over time]. If you are using this tool to compare your policy against, you should include the language in italics as the strongest examples for comparison.

Please note: South Dakota Model Wellness Policy is based on the Alliance for a Healthier Generation Model Wellness Policy. Visit healthiergeneration.org to observe the Alliance for a Healthier Generation Model Policy.

Preamble

De Smet School District (hereto referred to as the District) is committed to the optimal development of every student. The District believes that for students to have the opportunity to achieve personal, academic, developmental and social success, we need to create positive, safe and health-promoting learning environments at every level, in every setting, throughout the school year.

Research shows that two components, good nutrition and physical activity before, during and after the school day, are strongly correlated with positive student outcomes. For example, student participation in the U.S. Department of Agriculture’s (USDA) School Breakfast Program is associated with higher grades and standardized test scores, lower absenteeism and better performance on cognitive tasks.^{1,2,3,4,5,6,7} Conversely, less-than-adequate consumption of specific foods including fruits, vegetables and dairy products, is associated with lower grades among students.^{8,9,10} In addition, students who are physically active through active transport to and from school, recess, physical activity breaks, high-quality physical education and extracurricular activities – do better academically.^{11,12,13,14} Finally, there is evidence that adequate hydration is associated with better cognitive performance.^{15,16,17}

This policy outlines the District’s approach to ensuring environments and opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. **Specifically, this policy establishes goals and procedures to ensure that:**

- Students in the District have **access to healthy foods throughout the school day** – both through reimbursable school meals and other foods available throughout the school campus– in accordance with Federal and state nutrition standards;
- Students receive quality **nutrition education** that helps them develop lifelong healthy eating behaviors;
- Students have **opportunities to be physically active** before, during and after school;

**DE SMET SCHOOLS WELLNESS POLICY
BASED ON THE
ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
*Updated 4/2017***

- Schools engage in **nutrition and physical activity promotion** and other activities that promote student wellness;
- School staff are encouraged and supported to practice healthy nutrition and physical activity behaviors in and out of school;
- The community is engaged in supporting the work of the District in creating continuity between school and other settings for students and staff to practice lifelong healthy habits; and
- The District establishes and maintains an infrastructure for **management, oversight, implementation, communication** about and monitoring of the policy and its established goals and objectives.

This policy applies to all students, staff and schools in the District. Specific measurable goals and outcomes are identified within each section below.

I. School Wellness Committee

Committee Role and Membership

The District will convene a representative district wellness committee (hereto referred to as the local wellness committee or work within an existing school health committee) periodically to establish goals for and oversee school health and safety policies and programs, including development, implementation and periodic review and update of this district-level wellness policy (heretofore referred as “wellness policy”).

The local wellness committee membership will represent all school levels (elementary and secondary schools) and include (to the extent possible), but not be limited to: *parents and caregivers; students; representatives of the school nutrition program; physical education teachers; health education teachers; school health professionals; school administrators; school board members; health professionals; and the general public.*

Leadership

The Superintendent or designee(s) will convene the local wellness committee and facilitate development of and updates to the wellness policy, and will ensure each school's compliance with the policy.

The designated official for oversight is *MS/HS Principal; (605) 854-3674*

**DE SMET SCHOOLS WELLNESS POLICY
 BASED ON THE
 ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
 Updated 4/2017**

The names, titles, and contact information of these individuals are:

Name	Title / Relation to the School or District	Email address	Role on Committee
Daniel Bettin	MS/HS Principal	Daniel.Bettin@k12.sd.us	Co-Chair - Oversight
Nita Muser	Food Service Manager	Nita.muser@k12.sd.us	Co-Chair – Oversight, Nutrition Management
Cassi Johnson	Business Manager	Cassi.johnson@k12.sd.us	Staff member – assists in managing Wellness policy
Kyler Julius	K-12 School Counselor	Kyler.Julius@k12.sd.us	Staff member – assists in managing Wellness policy
Mark Birkel	K-12 Staff Member (Physical Education)	Mark.birkel@k12.sd.us	Staff member – assists in managing Wellness policy
Shannon Palmlund	HS/MS Staff Member/Parent	Shannon.palmlund@k12.sd.us	Staff member – assists in managing Wellness policy
Lacey Holt	Elem Staff Member	Lacey.holt@k12.sd.us	Staff member – assists in managing Wellness policy
Ivey Schoenfelder	Student	IS3256@k12.sd.us	Student – assists in managing Wellness policy – FACS & Wellness Coalition Rep
Ashley Tolzin	School Health Nurse/LPN	Atolzin@horizonhealthcare.org	Health Nurse – Health Education – assists in managing Wellness policy
Barb Asleson	School Board Rep/Parent	barbasleson@hotmail.com	School Board Rep – assists in managing Wellness policy
Abi Van Regenmorter	Superintendent/Elem Principal	Abi.vanregenmorter@k12.sd.us	Administrator – assists in managing Wellness policy

Each school will designate a school wellness policy coordinator, who will ensure compliance with the policy. Refer to Appendix A for a list of school-level wellness policy coordinators.

**DE SMET SCHOOLS WELLNESS POLICY
BASED ON THE
ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
Updated 4/2017**

II. Wellness Policy Implementation, Monitoring, Accountability and Community Engagement

Implementation Plan

The District will develop and maintain a plan for implementation to manage and coordinate the execution of this wellness policy. The plan delineates roles, responsibilities, actions and timelines specific to each school; and includes information about responsibilities, specific goals, and objectives for nutrition standards for all foods and beverages available on the school campus, food and beverage marketing, nutrition promotion and education, physical activity, physical education and other school-based activities that promote student wellness. It is recommended that the school use the [Healthy Schools Program online tools](#) to complete a school-level assessment based on the Centers for Disease Control and Prevention's School Health Index, create an action plan that fosters implementation and generate an annual progress report.

This wellness policy and the progress reports/policy updates can be found at: www.desmet.k12.sd.us

Recordkeeping

The District will retain records to document compliance with the requirements of the wellness policy at High School Office for three years past the current year. Documentation maintained in this location will include but will not be limited to:

- **The written wellness policy;**
- **Documentation demonstrating that the policy has been made available to the public;**
- **Documentation of efforts to review and update the Local Schools Wellness Policy; including an indication of who is involved in the update and methods the district uses to make stakeholders aware annually of their ability to participate on the local wellness committee;**
- **Documentation to demonstrate compliance with the annual public notification requirements;**
- **The most recent assessment on the implementation of the local school wellness policy;**
- **Documentation demonstrating the most recent assessment on the implementation of the Local School Wellness Policy has been made available to the public.**

Annual Notification of Policy

The District will actively inform families and the public each year of basic information about this policy, including its content, any updates to the policy and implementation status. The District will make this information available via the district website and/or district-wide communications. The District will provide as much information as possible about the school nutrition environment. This will include a summary of the District's events or activities related to wellness policy implementation. Annually, the District will also publicize the name and contact information of the District/MS/HS Principal leading and coordinating the committee, as well as information on how the public can get involved with the school wellness committee.

Triennial Progress Assessments

At least once every three years, the District will evaluate compliance with the wellness policy to assess the implementation of the policy for all sites under district jurisdiction and include:

**DE SMET SCHOOLS WELLNESS POLICY
BASED ON THE
ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
*Updated 4/2017***

- The extent to which schools under the jurisdiction of the District are in compliance with the local wellness policy;
- The extent to which the District's wellness policy compares to a model policy (like the Alliance for a Healthier Generation's model wellness policy or the State Model Wellness Policy); and
- A description of the progress made in attaining the goals of the District's wellness policy.
 - Assessment will identify how the policy will be updated to add areas as needed, improve progress toward goals, etc.
 - Documentation of when and how the policy was evaluated will be maintained.

The position/person responsible for managing the triennial assessment and contact information is Daniel Bettin – MS/HS Principal

(605) 854-3674

Daniel Bettin@k12.sd.us

The local wellness committee, in collaboration with individual schools, will monitor schools' compliance with this wellness policy.

The District will actively notify households/families of the availability of the triennial progress report.

Revisions and Updating the Policy

The local wellness committee will update or modify the wellness policy based on the results of the annual School Health Index and triennial assessments and/or as District priorities change; community needs change; wellness goals are met; new health science, information, and technology emerges; and new Federal or state guidance or standards are issued. **The wellness policy will be assessed and updated as indicated at least every three years, following the triennial assessment. Documentation of update will be maintained, such as attendance sheet, meeting minutes, etc.**

Community Involvement, Outreach and Communications

The District is committed to being responsive to community input, which begins with awareness of the wellness policy. The District will actively communicate ways in which representatives of local wellness committee and others can participate in the development, implementation and periodic review and update of the wellness policy through a variety of means appropriate for that district. The District will also inform parents of the improvements that have been made to school meals and compliance with school meal standards, availability of child nutrition programs and how to apply, and a description of and compliance with Smart Snacks in School nutrition standards. The District will use electronic mechanisms, such as email or displaying notices on the district's website, as well as non-electronic mechanisms, such as newsletters, presentations to parents, or sending information home to parents, to ensure that all families are actively notified of the content of, implementation of, and updates to the wellness policy, as well as how to get involved and support the policy. The District will ensure that communications are culturally and linguistically appropriate to the community, and accomplished through means similar to other ways that the district and individual schools are communicating important school information with parents.

**DE SMET SCHOOLS WELLNESS POLICY
BASED ON THE
ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
*Updated 4/2017***

The District will actively notify the public about the content of or any updates to the wellness policy annually, at a minimum. The District will also use these mechanisms to inform the community about the availability of the annual and triennial reports.

III. Nutrition

School Meals

Our school district is committed to serving healthy meals to children, with plenty of fruits, vegetables, whole grains, and fat-free and low-fat milk; that are moderate in sodium, low in saturated fat, and have zero grams *trans* fat per serving (nutrition label or manufacturer's specification); and to meeting the nutrition needs of school children within their calorie requirements. The school meal programs aim to improve the diet and health of school children, help mitigate childhood obesity, model healthy eating to support the development of lifelong healthy eating patterns and support healthy choices while accommodating cultural food preferences and special dietary needs.

All schools within the District participate in USDA child nutrition programs, including the National School Lunch Program (NSLP). All schools within the District are committed to offering school meals through the NSLP and SBP programs, and other applicable Federal child nutrition programs, that:

- Are accessible to all students;
- Are appealing and attractive to children;
- Are served in clean and pleasant settings;
- Meet or exceed current nutrition requirements established by local, state, and Federal statutes and regulations. (The District offers reimbursable school meals that meet [USDA nutrition standards](#).)
- Promote healthy food and beverage choices, such as one or more of the following:
 - Whole fruit options are displayed in attractive bowls or baskets (instead of chaffing dishes or hotel pans).
 - Sliced or cut fruit is available daily.
 - Daily fruit options are displayed in a location in the line of sight and reach of students.
 - All available vegetable options have been given creative or descriptive names.
 - All staff members, especially those serving, have been trained to politely prompt students to select and consume the daily vegetable options with their meal.
 - White milk is placed in front of other beverages in all coolers.
 - Alternative entrée options (e.g., salad bar, yogurt parfaits, etc.) are highlighted on posters or signs within all service and dining areas.
 - A reimbursable meal can be created in any service area available to students (e.g., salad bars, snack rooms, etc.).
 - Student surveys and taste testing opportunities are used to inform menu development, dining space decor and promotional ideas.
 - Student artwork is displayed in the service and/or dining areas.
 - Breakfast is served in both buildings.
 - Local farm to school programs are utilized for beef and apples.

Staff Qualifications and Professional Development

All school nutrition program directors, managers and staff will meet or exceed hiring and annual continuing education/training requirements in the [USDA professional standards for child nutrition](#)

DE SMET SCHOOLS WELLNESS POLICY
BASED ON THE
ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
Updated 4/2017

[professionals](#). These school nutrition personnel will refer to [USDA's Professional Standards for School Nutrition Standards website](#) to search for training that meets their learning needs.

Water

To promote hydration, free, safe, unflavored drinking water will be available to all students throughout the school day* and throughout every school campus* (“school campus” and “school day” are defined in the glossary). The District will make drinking water available where school meals are served during mealtimes. Students at the MS/HS may carry water with them throughout the day in a clear water bottle. Students at LIW have a water bottle accessible to them throughout the day.

Competitive Foods and Beverages

The District is committed to ensuring that all foods and beverages available to students on the school campus* during the school day* support healthy eating. The foods and beverages sold and served outside of the school meal programs (e.g., “competitive” foods and beverages) will meet the USDA Smart Snacks in School nutrition standards, at a minimum. Smart Snacks aim to improve student health and well-being, increase consumption of healthful foods during the school day and create an environment that reinforces the development of healthy eating habits. A summary of the standards and information, as well as a Guide to Smart Snacks in Schools are available at:

<http://www.fns.usda.gov/healthierschoolday/tools-schools-smart-snacks>. The Alliance for a Healthier Generation provides a set of tools to assist with implementation of Smart Snacks available at www.foodplanner.healthiergeneration.org.

To support healthy food choices and improve student health and well-being, all foods and beverages outside the reimbursable school meal programs that are sold to students on the school campus during the school day* will meet or exceed the USDA Smart Snacks nutrition standards. These standards will apply in all locations and through all services where foods and beverages are sold, which may include, but are not limited to, à la carte options in cafeterias, vending machines, school stores and snack or food carts.

Celebrations and Rewards (Optional)

All foods offered on the school campus will meet or exceed the USDA Smart Snacks in School nutrition standards including through:

1. Celebrations and parties. The district will suggest a list of healthy party ideas to parents and teachers, including non-food celebration ideas. Healthy party ideas are available from the [Alliance for a Healthier Generation](#) and from the [USDA](#).
2. Classroom snacks brought by parents. The District will suggest to parents a [list of foods and beverages that meet Smart Snacks](#) nutrition standards.
3. Rewards and incentives. The District will provide teachers and other relevant school staff a [list of alternative ways to reward children](#). Foods and beverages will not be used as a reward, or withheld as punishment for any reason, such as for performance or behavior.

Fundraising

Foods and beverages that meet or exceed the USDA Smart Snacks in Schools nutrition standards may be sold through fundraisers on the school campus* during the school day*. The District will make

DE SMET SCHOOLS WELLNESS POLICY
BASED ON THE
ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
Updated 4/2017

available to parents and teachers a list of healthy fundraising ideas [examples from the [Alliance for a Healthier Generation](#) and the [USDA](#)].

Nutrition Promotion

Nutrition promotion and education positively influence lifelong eating behaviors by using evidence-based techniques and nutrition messages, and by creating food environments that encourage healthy nutrition choices and encourage participation in school meal programs. Students and staff will receive consistent nutrition messages throughout schools, classrooms, gymnasiums, and cafeterias. Nutrition promotion also includes marketing and advertising nutritious foods and beverages to students and is most effective when implemented consistently through a comprehensive and multi-channel approach by school staff, teachers, parents, students and the community.

The District will promote healthy food and beverage choices for all students throughout the school campus, as well as encourage participation in school meal programs. This promotion will occur through at least:

- Review and consider evidence-based healthy food promotion techniques through the school meal programs using [Smarter Lunchroom techniques](#); and
- Ensuring 100% of foods and beverages promoted to students meet the USDA Smart Snacks in School nutrition standards. Additional promotion techniques that the District and individual schools may use are available at <http://www.foodplanner.healthiergeneration.org/>.

Nutrition Education

The District will teach, model, encourage and support healthy eating by all students. Schools will provide nutrition education and engage in nutrition promotion that:

- Is designed to provide students with the knowledge and skills necessary to promote and protect their health;
- Is part of not only health education classes, but also integrated into other classroom instruction through subjects such as math, science, language arts, social sciences and elective subjects;
- Includes enjoyable, developmentally-appropriate, culturally-relevant and participatory activities, such as cooking demonstrations or lessons, promotions, taste-testing;
- Promotes fruits, vegetables, whole-grain products, low-fat and fat-free dairy products and healthy food preparation methods;
- Emphasizes caloric balance between food intake and energy expenditure (promotes physical activity/exercise);
- Links with school meal programs, cafeteria nutrition promotion activities, school foods and nutrition-related community services; and
- Includes nutrition education training for teachers and other staff.

Nutrition Education will be achieved by:

- *Teaching consistent scientifically-based nutrition messages through the school, classroom, cafeteria, home, community, and media*
- *Health education classes and/or standalone courses (K-5 science, 7th grade middle school science, 8th grade FACS, high school health, Nutrition and Wellness)*

DE SMET SCHOOLS WELLNESS POLICY
BASED ON THE
ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
Updated 4/2017

- *The scope and sequence of the curriculum in core subject areas such as math, science, language arts, social sciences, and elective subjects*
- *Including in the school cafeteria which serves as a “learning laboratory” to allow student to apply critical thinking skills taught in the classroom: (National School Lunch Week promotions, nutrition posters, fruit and veggie bar at all District buildings)*
- *Using the SD Health Education Standards and addresses nutrition concepts progressively in grades K through 12.*
- *Providing enjoyable, developmentally appropriate, culturally relevant, and participatory activities*
- *Offering information to families that encourages them to teach their children about health and nutrition, and assists them in planning nutritious meals for their families (FCCLA presentations and displays, information from TEAM Nutrition, LIW Newsletter, Social Media)*
- *Staff who are adequately prepared and who participate in professional development activities in order to deliver an effective program (staff team attends the summer conference)*
- *Including a school nutrition/health team, such as TEAM Nutrition, to conduct nutrition education activities and promotions that involve parents, students, and the community.*

Essential Healthy Eating Topics in Health Education – Suggested

The District will include a health education curriculum; examples of topics below:

- Relationship between healthy eating and personal health and disease prevention
- Food guidance from [MyPlate](#)
- Reading and using FDA's nutrition fact labels
- Eating a variety of foods every day
- Balancing food intake and physical activity
- Eating more fruits, vegetables and whole grain products
- Choosing foods that are low in fat, saturated fat, and cholesterol and do not contain *trans* fat
- Choosing foods and beverages with little added sugars
- Eating more calcium-rich foods
- Preparing healthy meals and snacks
- Risks of unhealthy weight control practices
- Accepting body size differences
- Food safety
- Importance of water consumption
- Importance of eating breakfast
- Making healthy choices when eating at restaurants
- Eating disorders
- [The Dietary Guidelines for Americans](#)
- Reducing sodium intake
- Social influences on healthy eating, including media, family, peers and culture
- How to find valid information or services related to nutrition and dietary behavior
- How to develop a plan and track progress toward achieving a personal goal to eat healthfully
- Resisting peer pressure related to unhealthy dietary behavior
- Influencing, supporting, or advocating for others' healthy dietary behavior

Food and Beverage Marketing in Schools

The District is committed to providing a school environment that ensures opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. The District strives to teach students how to make informed choices about

DE SMET SCHOOLS WELLNESS POLICY
BASED ON THE
ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
Updated 4/2017

nutrition, health and physical activity. These efforts will be weakened if students are subjected to advertising on District property that contains messages inconsistent with the health information the District is imparting through nutrition education and health promotion efforts. It is the intent of the District to protect and promote student's health by permitting advertising and marketing for only those foods and beverages that are permitted to be sold on the school campus, consistent with the District's wellness policy.

Any foods and beverages marketed or promoted to students on the school campus* during the school day* will meet or exceed the USDA Smart Snacks in School nutrition standards such that only those foods that comply with or exceed those nutrition standards are permitted to be marketed or promoted to students on campus during the school day*

Food and beverage marketing is defined as advertising and other promotions in schools. Food and beverage marketing often includes an oral, written, or graphic statements made for the purpose of promoting the sale of a food or beverage product made by the producer, manufacturer, seller or any other entity with a commercial interest in the product.¹⁵ This term includes, but is not limited to the following:

- Brand names, trademarks, logos or tags, except when placed on a physically present food or beverage product or its container.
- Displays, such as on vending machine exteriors
- Corporate brand, logo, name or trademark on school equipment, such as marquees, message boards, scoreboards or backboards (Note: immediate replacement of these items are not required; however, districts will replace or update scoreboards or other durable equipment when existing contracts are up for renewal or to the extent that is financially possible over time so that items are in compliance with the marketing policy.)
- Corporate brand, logo, name or trademark on cups used for beverage dispensing, menu boards, coolers, trash cans and other food service equipment; as well as on posters, book covers, pupil assignment books or school supplies displayed, distributed, offered or sold by the District.
- Advertisements in school publications or school mailings.
- Free product samples, taste tests or coupons of a product, or free samples displaying advertising of a product.

As the District/school nutrition services/Athletics Department/PTO reviews existing contracts and considers new contracts, equipment and product purchasing (and replacement) decisions should reflect the applicable marketing guidelines established by the District wellness policy.

IV. Physical Activity

Children and adolescents should participate in at least 60 minutes of physical activity every day. A substantial percentage of students' physical activity can be provided through a comprehensive school physical activity program (CSPAP). A CSPAP reflects strong coordination and synergy across all of the components: quality physical education as the foundation; physical activity before, during and after

**DE SMET SCHOOLS WELLNESS POLICY
BASED ON THE
ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
*Updated 4/2017***

school; staff involvement and family and community engagement and the district is committed to providing these opportunities. Schools will ensure that these varied physical activity opportunities are in addition to, and not as a substitute for, physical education (addressed in “Physical Education” subsection). All schools in the district will be encouraged to participate in *Let’s Move! Active Schools* (www.letsmoveschools.org) in order to successfully address all CSPAP areas.

Physical activity during the school day (including but not limited to recess, classroom physical activity breaks or physical education) **will not be withheld** as punishment for any reason, unless no other alternative is available. The district will provide teachers and other school staff with a [list of ideas](#) for alternative ways to discipline students.

To the extent practicable, the District will ensure that its grounds and facilities are safe and that equipment is available to students to be active. The District will conduct necessary inspections and repairs.

Physical Education

The District will provide students with physical education, using an age-appropriate, sequential physical education curriculum consistent with national and state standards for physical education. The physical education curriculum will promote the benefits of a physically active lifestyle and will help students develop skills to engage in lifelong healthy habits, as well as incorporate essential health education concepts (discussed in the “*Essential Physical Activity Topics in Health Education*” subsection). The curriculum will support the essential components of physical education.

All students will be provided equal opportunity to participate in physical education classes. The District will make appropriate accommodations to allow for equitable participation for all students and will adapt physical education classes and equipment as necessary.

All District **elementary students** in each grade will receive physical education for at least 120 minutes per every two weeks throughout the school year.

All **secondary students** (middle and high school) are required to take the equivalent of one academic year of physical education, and meeting minimum state PE/Health Education requirements, grade eight students will participate in one semester of physical education and one semester of health class. These courses qualify for high school graduation credit.

Examples of Physical Activity Topics in Health Education

- The physical, psychological, or social benefits of physical activity
- How physical activity can contribute to a healthy weight
- How physical activity can contribute to the academic learning process
- How an inactive lifestyle contributes to chronic disease
- Health-related fitness, that is, cardiovascular endurance, muscular endurance, muscular strength, flexibility, and body composition
- Differences between physical activity, exercise and fitness
- Phases of an exercise session, that is, warm up, workout and cool down
- Overcoming barriers to physical activity
- Decreasing sedentary activities, such as TV watching
- Opportunities for physical activity in the community

**DE SMET SCHOOLS WELLNESS POLICY
BASED ON THE
ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
*Updated 4/2017***

- Preventing injury during physical activity
- Weather-related safety, for example, avoiding heat stroke, hypothermia and sunburn while being physically active
- How much physical activity is enough, that is, determining frequency, intensity, time and type of physical activity
- Developing an individualized physical activity and fitness plan
- Monitoring progress toward reaching goals in an individualized physical activity plan
- Dangers of using performance-enhancing drugs, such as steroids
- Social influences on physical activity, including media, family, peers and culture
- How to find valid information or services related to physical activity and fitness
- How to influence, support, or advocate for others to engage in physical activity
- How to resist peer pressure that discourages physical activity.

Recess (Elementary)

All elementary schools will offer at least **30 minutes of recess** on all days during the school year (*This policy may be waived on early dismissal or late arrival days*). If recess is offered before lunch, schools will have appropriate hand-washing facilities and/or hand-sanitizing mechanisms located just inside/outside the cafeteria to ensure proper hygiene prior to eating and students are required to use these mechanisms before eating. Hand-washing time, as well as time to put away coats/hats/gloves, will be built in to the recess transition period/timeframe before students enter the cafeteria.

Outdoor recess will be offered when weather is feasible for outdoor play. Students will be allowed outside for recess except when outdoor temperature is above/below -10°F, inclusive of wind chill factors, during storms with lightening or thunder, or at the discretion of the building administrator based on his/her best judgment of safety conditions.

In the event that the school or district must conduct **indoor recess**, teachers and staff will promote physical activity for students, to the extent practicable.

Recess will complement, not substitute, physical education class. Recess monitors or teachers will encourage students to be active, and will serve as role models by being physically active alongside the students whenever feasible.

Classroom Physical Activity Breaks (Elementary and Secondary)

The District recognizes that students are more attentive and ready to learn if provided with periodic breaks when they can be physically active or stretch. Thus, students will be offered **periodic opportunities** to be active or to stretch throughout the day on all or most days during a typical school week. The District recommends teachers provide short (3-5-minute) physical activity breaks to students during and between classroom time at least three days per week. These physical activity breaks will complement, not substitute, for physical education class, recess, and class transition periods.

Active Academics

Teachers will incorporate movement and kinesthetic learning approaches into “core” subject instruction when possible (e.g., science, math, language arts, social studies and others) and do their part to limit sedentary behavior during the school day.

**DE SMET SCHOOLS WELLNESS POLICY
BASED ON THE
ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
*Updated 4/2017***

The District will support classroom teachers incorporating physical activity and employing kinesthetic learning approaches into core subjects by providing annual professional development opportunities and resources, including information on leading activities, activity options, as well as making available background material on the connections between learning and movement.

Teachers will serve as role models by being physically active alongside the students whenever feasible.

Before and After School Activities

The District offers opportunities for students to participate in physical activity either before and/or after the school day (or both) through a variety of methods. The District will encourage students to be physically active before and after school by:

- Middle and high school interscholastic sports
- Strength and conditioning opportunities
- The school will offer activities that meet the needs, interests, and abilities of all students, including boys, girls, students with disabilities, and students with special health care needs
- Schools will educate and encourage participation in community or club activities
 - Youth wrestling, youth football, youth basketball programs, 4-H activities, summer recreation programs

Active Transport

The District will support active transport to and from school, such as walking or biking. The District will encourage this behavior by engaging in *six or more* of the activities below; including but not limited to:

- Designate safe or preferred routes to school
- Promote activities such as participation in National Walk and Bike to School Week
- Secure storage facilities for bicycles and helmets
- Promote safe routes program to students, staff, and parents via newsletters, websites, local newspaper
- Use crosswalks on streets leading to schools
- Document the number of children walking and or biking to and from school
- Bike safety ad bike repair events

V. Other Activities that Promote Student Wellness

The District will integrate wellness activities across the entire school setting, not just in the cafeteria, other food and beverage venues and physical activity facilities. The District will coordinate and integrate other initiatives related to physical activity, physical education, nutrition and other wellness components so all efforts are complementary, not duplicative, and work towards the same set of goals and objectives promoting student well-being, optimal development and strong educational outcomes.

Schools in the District are encouraged to coordinate content across curricular areas that promote student health, such as teaching nutrition concepts in mathematics, with consultation provided by either the school or the District's curriculum experts.

**DE SMET SCHOOLS WELLNESS POLICY
BASED ON THE
ALLIANCE FOR A HEALTHIER GENERATION MODEL WELLNESS POLICY
*Updated 4/2017***

All efforts related to obtaining federal, state or association recognition for efforts, or grants/funding opportunities for healthy school environments will be coordinated with and complementary of the wellness policy, including but not limited to ensuring the involvement of the local wellness committee.

All school-sponsored events will adhere to the wellness policy guidelines. All school-sponsored wellness events will include physical activity and healthy eating opportunities when appropriate.

Community Partnerships

The District will develop, enhance, or continue relationships with community partners (e.g., hospitals, universities/colleges, local businesses, SNAP-Ed providers and coordinators, community wellness center, etc.) in support of this wellness policy's implementation. Existing and new community partnerships and sponsorships will be evaluated to ensure that they are consistent with the wellness policy and its goals. The De Smet Community has an active Wellness Coalition committee that is partnered with SDSU Extension office. The school district partners with local health care providers to offer vision screens, dental screens, and flu shots for students.

Community Health Promotion and Family Engagement

The District will promote to parents/caregivers, families, and the general community the benefits of and approaches for healthy eating and physical activity throughout the school year. Families will be informed and invited to participate in school-sponsored activities and will receive information about health promotion efforts.

As described in the "Community Involvement, Outreach, and Communications" subsection, the District will use electronic mechanisms (e.g., email or displaying notices on the district's website), as well as non-electronic mechanisms, (e.g., newsletters, presentations to parents or sending information home to parents), to ensure that all families are actively notified of opportunities to participate in school-sponsored activities and receive information about health promotion efforts.

Staff Wellness and Health Promotion

The local wellness committee will focus on staff wellness issues, identifies and disseminates wellness resources and performs other functions that support staff wellness in coordination with human resources staff.

Professional Learning

When feasible, the District will offer annual professional learning opportunities and resources for staff to increase knowledge and skills about promoting healthy behaviors in the classroom and school (e.g., increasing the use of kinesthetic teaching approaches or incorporating nutrition lessons into math class). Professional learning will help District staff understand the connections between academics and health and the ways in which health and wellness are integrated into ongoing district reform or academic improvement plans/efforts.
